

## Maximum Fill Volumes

The illustration below presents the maximum fill volumes based on rotor types in order to prevent liquid from entering the cap/sealing area during centrifugation. If liquid enters the cap/sealing area during centrifugation there is a potential for leakage. Please refer to your rotor manual for additional information.

**Figure 1** Maximum Fill Volume

-339381 PP bottle is used on bottle assemblies 355607 and 361691.

-339245 PC bottle is used on bottle assemblies 355605 and 361690.
